Before putting your pet under anesthesia, we will perform a full physical exam. However, many conditions such as liver, kidney, or blood disorders cannot be detected unless a blood test is performed. Such tests are important before any surgery is performed. We highly recommend this test for all animals. For animals that are 7 years of age or older it is mandatory. The cost is \$44.00. Our lab is fully equipped to give results immediately; before any anesthesia or surgery is performed.
_____ Yes, I want the pre-anesthesia blood screen.
_____ No, I do not want the pre-anesthesia blood screen.
